### **Risk Factors**

Exploration-stage mineral exploration companies face a variety of risks and, while unable to eliminate all of them, Navy aims at managing and reducing such risks as much as possible. Few exploration projects successfully achieve development stage, due to factors that cannot be predicted or anticipated, and even one such factor may result in the economic viability of a project being detrimentally impacted such that it is neither feasible nor practical to proceed. Navy closely monitors its activities and those factors that could impact them, and employs experienced consultants to assist in its risk management and to make timely adequate decisions. Environmental laws and regulations could also impact the viability of a project. Navy has ensured that it has complied with these regulations, but there can be changes in legislation outside Navy's control that could also add a risk factor to a project.

### **Financial Instruments and Other Instruments**

The carrying amounts of cash, receivables, and accounts payable approximate fair value because of the short-term maturity of these items.
